- ❖ **Community participation is not the problem.**
- ❖ **Government and professionals participation is needed in people's work.**
- ❖ **Community initiatives need to be respected, Accepted and supported by professionals and Government**

Development Barriers

The Psychological Barrier: The politicians, planers & people are thinking that development is the work of govt, this can be overcome realizing leakage in resources and adopting the component sharing model

Leakage in Govt. Resources

Contractor Profit 10 %	Tax 5%	
Departmental Charges 12.50 %	Contingency 3 %	
Officials 15-20%	Undeclared Contractor profit 10-15 %	
■ Total leakage (more than)		60 %

2 The Social Barrier:

This can be overcome once Community realise that the lane in front of their houses also belong to them and clearly identify its immediate objective

3 The Economic Barrier:

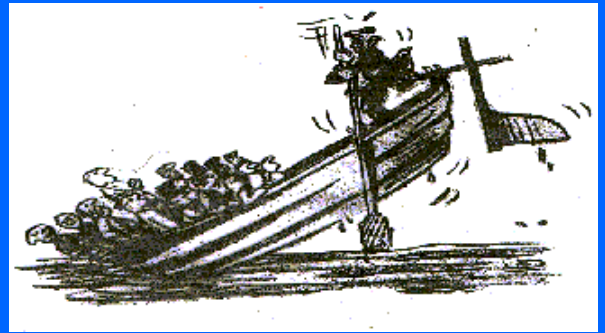

This can be rectified through affordable cost of development, using appropriate technologies, tariff discount in service charges etc.

4 The Technical Barrier:

This can be resolved by providing training for estimation, designing, technical back up support during implementation, O&M

With out Participation

Government Conventional Development

Component Sharing

Total Sanitation

• ASB is ensuring the target of total sanitation, in this regard all the residents of lane are mobilize to construct latrines, take connection with lane sewers and close the open drains.

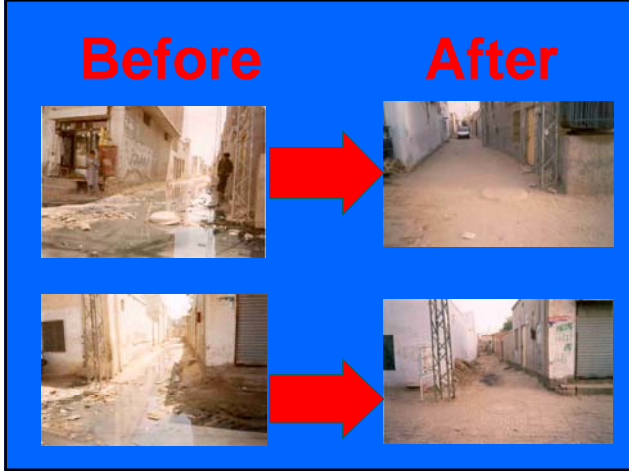

• All the Inhabitants have to pay their share to make the sense of ownership and to maintain the dignity.

Before

After

Achievements

- Work expanded from one lane to 11 Cities
- This project will be marked as a first public private partnership which using ultra modern GIS technology for development and having essence of community involvement
- This Component Sharing development model included in the National Water and Sanitation policy of the Government Pakistan.
- Environmental condition, economic activities and value of properties increased.
- Neighborhood disputes over water and sanitation are a thing of the past
- This is the out come of demonstration effect of the lane with underground piped water and sewerage which reclaimed space for children's play and pedestrian access.

فلاحی اور ترقیاتی میں نرق

ترقیاتی کام

لوگوں کی ضروریات اور ذمہ داریوں پر توجہ
لوگوں کی صلاحیتوں اور وسائل پر توجہ
ضروریات خود پوری کرنا سکھایا جاتا ہے
ضروریات مستقل طور پر پوری ہوتی ہیں
خود انحصاری کا احساس بڑھتا ہے
ادنیٰ کا اعلیٰ سطح کی طرف ارتقاء
نشوونما

فلاحی کام

لوگوں کی ضروریات پر توجہ
لوگوں کی کمزوریوں پر توجہ
ضروریات پوری کی جاتی ہیں
ضروریات وقتی طور پر پوری ہوتی ہیں
محتاجی کا احساس بڑھتا ہے
زراعتی موجودہ سطح پر ہی رہتا ہے
خیرات

اپنی مدد آپ - ترقی کاراز

اسپیسے خود خرچ کر کے احساس ملکیت پیدا ہوتا ہے

Water

- 70% of the earth's surface is covered with water,
- 97.5% of all water on earth is brackish.
- 2.5% that is fresh,
- 70% is frozen
- Less than 1% of the earth's fresh water
- Only about 0.007% of all water on earth is available, on sustainable basis, for our use.

5/7/2006 13

Dr. Akhtar Hameed Khan says:
Problem of Pakistan is
not
Economic
but Moral

5/7/2006

Critical Issue is

- Wastage of resources rather than lack of resources
